Mr. Boulware is particularly well fitted for the position to which he has been elected, having for many years acted in the capacity of counsel for the bank. Since the illness of Mr. Davenport he has practically been the head of affairs in the bank, being chairman of the committee by which all business was transacted. Probably there is no man in the city who has a keener insight into financial matters than the newly-elected president, who will at once enter upon the discharge of his due.

Mr. Boulware is a native of King and Queen county and is in the forty-seventh year of his age. He received his early education under Gessner Harrison, of Albemarle, and Henry Schooler, of Cardine, In 1861 he entered the Confederate army as

Mr. Isaac Davenport, Jr., Resigned.

At a meeting of the directors of the First National Bank held yesterday for the purpose of filling the position of president of the bank, rendered vacant by the resignation of Mr. Isaac Davenport, Jr., Mr. A. I. Boniware was unanimously elected.

The names of Mr. Boulware and Mr. Virginius Newton had both been prominently mentioned in connection with the position. The issue was made by the friends of Mr. Newton in the election of director to succeed Mr. Davenport. Mr. Newton and Mr. James Miller, the latter cashier of the Union Bank, were put in nomination and the vote resulted in a tie, six directors voting for each of the gentlemen. Mr. Newton not desiring to postpone further the election of president his friends withdrew his name and Mr. Miller was unanimously chosen. The board then selected Mr. Boulware as the bank's new president.

[By telegrah to the Dispatch.] SAN FRANCISCO. June 15.—President Fulds, of the California Athletic, has made public a long statement of the club's position in regard to the recent Corbett Jackson fight. After telling of the efforts of the club to encourage legitimate sport, Mr. Fulds says the club has been imposed. The occasion for this rather unusual Mr. Fulda says the club has been imposed upon many times, and was forced to make rules for its own protection. The men were instructed to make a finish fight but refused. Each had victory within his grasp but dared not take it. The referee could come to but one conclusion—that both the principuls decided not to take any risk, and preferred to save their friends' money and their reputation in preference to keeping the agreement with the club.

The occasion for this rather unusual demonstration was the seventeenth and emonstration was the seventeenth and the Richmond High School, and as the number of graduates surpassed that of any preceding year the audience was also proportionately large. ONIONS AND WATERCRESSES. Both Are Very Healthful Vegetables-Antidotes for Onion Breath. [Scientific American.]

The watercress is a plant containing very sanitary qualities. A curious characteristic of it is that if grown in a ferruginous stream it absorbs into itself five times the stream it absorbs into itself five times the amount of iron that any other plant does. For all anæmic constitutions it is, therefore, specially of value. But it also contains proportions of garlic and sulphur of iodine and phosphates, and is a blood purifier, while abroad it is thought a most wholesome condiment with meat, rosat or grilled. The cultivated plant is rather more easy of digestion than the wild one. Botanically the onion belongs to the lily family. e odor of the vegetable, which is what

family.

The odor of the vegetable, which is what makes it so unpleasant, is due to a volatile oil, which is the same as that in garlic, though in the onion it is mider and naturally does not last solong. There are besides easy ways of removing at once all unpleasantness from the breath. A little parsley or a few grains of coffee, or even a swallow or two of milk, if taken after eating, proves an effective remedy. Boiled onions are the least objectionable in regard to odor, and are as easily digested as any.

The oil in the onion passes off in the water in which the vegetables are boiled, and if the kettle be kept closely covered and the water changed after they have boiled five minutes and then again ten minutes later there will be no odor through the house and the onions will be white instead of gray, as they so often are. Besides being rich in fiesh-forming elements raw onions are especially good in breaking up a heavy cold. They are also stimulating to fatigued persons and are otherwise beneficial.

About quarter-past 8 o'clock the Blue Band, which furnished music for the occasion, struck up a lively air and shortly afterwards the graduating, senior, and intermediate classes filed in upon the stage, presenting a beautiful scene.

The girls, and there were scores of them, were largely in the majority over the boys, and each of them looked her prettiest. They formed one long, winding line as they took their seats, and never was there a lovelier sight witnessed in Virginia's capital.

LIFE AND CHARACTER OF LEE.

Professor Thomas then appeared before the audience again, and stated that the next speaker was Fenton McBain, who would deliver the oration upon the "Life and Character of General R. E. Lee." He further added that the orator was the winner of the medal which had been offered for the best oration upon this subject.

Mr. McBain was introduced and greeted by the audience with considerable applause. His subject was one ever popular, and he showed in his address that he was thoroughly acquainted with the incidents connected with the life of the Confederate hero.

He stated that the subject of his addrese was the "Peerage of America," and after referring in graceful and complimentary language to the pretty graduates upon the stage, he said:

stage, he said:

Each young lady of you has thirteen suitors I know. The deep interest of the evening centres here in these graduates, for to-night the school books will be laid aside, and to-morrow you will go out into the world to apply the lessons in the school of actual, practical life. There have been graduates and graduates, those who have been lost to the world, but I am certain that we shall hear from these farther on in the pathway of life." the pathway of life."

THE PERRAGE OF AMERICA. Commencing then upon his original subject the orator said that America—discovered by a poor man—was pre-eminently the place for the poor. "It has been said," added he, "that we have no nobility in America. It is untrue, we have a nobility—a nobility independent of purple pomp and the glittering sheen of the cloth of gold—independent of especial skill in baccarat. [Apdlanse.] We have a nobility and we have a peerage in America, but our peerage is the peerage of merit and courage and worth. The Body of a Yonng Woman Found Perfectly Preserved After Forty Years.

Mehigan City special in the Globe-Democration of the Supreme father's home, two miles south of this place, nearly forty years ago. A few days ago her body was recovered in an abandoned bog iron-ore pit, without one vestige of change from the appearance it had known in life. The last shred of clothing was long ago destroyed by the action of the water in which she had met her death, but the same chemicals which removed the garments preserved the flesh.

Not only is the contour of the form perfect as in life, but the color has remained unchanged. The arms and shoulders are as white as marble, the hands are brown, but suffused with a ruddy flush, which old settlers here will remember as one of the girl's chief charms, and, were it not for the unsightly cavities that once contained the eyes, that petrified frame which has late.

WHAT IS LIFE?

The exercises of the evening were opened by Professor Thomas introducing Miss Alma Lindner, the essayist of the occasion, who had chosen as her subject. "What is Life?"

She is a pretty little brunette and commands an excellent delivery. When she bowed before the tremendous andience she was met with enthusiastic applause, but this ovation did not so embarrass her that she failed to read her essay in the most excellent manner. It showed the most cares are in any one of the girl's chief charms, and, were it not for the unsight varieties of the contained the eves, that petrified frame which has lain almost half a century in the soil would appear the peacefully-sleeping figure of a healthy, handsome, young woman. The story of Mary Ann Greer is easily told. In the first place it should be known that this whole country is full of a kind of iron called bog ore. In an early day it was extensively mined by the stranger and hauled by them to Michigan City and South Bend, where it commanded a ready sale, in many instances its was the one

The iron is in small particles, much like the ore from larger mines, and is excellent in quality, though not rich enough in quantity to repay the trouble of mining it since the day of railroads and the development of Pennsylvania mines. None of the ore has been taken from these swamps since 1850, although the swamp lands all over Northern Indiana are full of it.

Mary Grier was the eldest daughter of Nicholas Grier and was a belle in those old days of 1845 to 1850. She was famous all

for the best oration upon this subject.

Mr. McBain was introduced and greeted by the audience with considerable applause. His subject was one ever popular, and he showed in his address that he was thorougally acquainted with the incidentation.

MISS HARTMAN'S ESSAY.

After the close of the oration and some very sweet music by the band, Miss Lottie Hartman was introduced. It was an nounced that her subject was the "Ship of Faith," and the audience doubtless anticipated something of a sober and rather somber nature, but in this they were pleasantly surprised.

In the first place Miss Hartman is herself as bright and pretty as possible, with a piquante, merry air, and then her selection was an exceedingly comic story in the negro dialect. She delivered it in excellent style and brought down the house with langhter. Perhaps she made the hit of the evening, certainly she acquitted herself beautifully. Miss Hartman possesses a decided dramatic talent and a clear musical voice over which she has excellent command.

SHE NEVER FELT THE SQUEEZE.

[Chicago Tribune-] He was a puzzled young man and he had come to his married sister for information. "Say, Nell!" said he. "What kind of a girl is that Smith girl, anyhow?"

"Why?" sagely answered his sister.
"I took her to the theatre last night, and of one of them and squeezed it,"
"And she snatched her hand away and said you ought to be ashamed of

"What did she do?"
"Nothing: didn't seem to know her hand had been squeezed."
"Then what?"

"Then what?"

"I tried it again later on. Same thing. I tried it a third time. Samething. Then I gave it up. Now, what sort of a girl is that? I thought girls usually did one thing or the other."

"So they do when they know what's going on. She didn't feel your squeeze."

"But I squeezed hard the third time."

"That doesn't make any difference."

Well, what's the matter with the girl?"

Why, nothing. She's all right; it's her

The discovery of the beautiful and cost. ly timber known as mahogany was purely accidental. The first mention made of it was by Sir Walter Raleigh, who used it in was by Sir Walter Raleigh, who used it in 1597 at Trinidid for repairing his ships. About the beginning of the eighteenth century a small quantity of it was taken to England by a West India captain named Gibbons, who sent a few planks to his brother, a physician residing in London. This gentleman at the time of the receipt of the wood was having a bouse built, and aleaed the planks in the hands of the car-

These specimens of cabinet-work caused the rejected wood to become a prominent factor in the construction of luxurious pieces of furniture. Thus Wollaston was amply rewarded for his perseverance in fashioning it into the candla-box, and his name, together with that of the physician and his nautical brother, became inseparably connected with the history of the introduction of this wood into civilized lands.

A Disparch reporter called on the eminent jurist of jurists shortly after dinner and asked for an interview, whereupon Mr. Fuller in a most affable manner replice:
"I will gladly tell you anything I know."
The elated reporter took out his notebook in a confidential manner, but the Chief Justice continued:

Chief Justice continued:

"I know nothing except that I am here with these gentlemen. I will be here tomorrow; at 10 o'clock we institute the court, and—that's all."

In regard to general or political matters Mr. Fuller said nothing. He is a fluent talker, and makes one feel easy and natural in his presence by his engaging manners and excellent nature.

As the "man of the note-book" from the Disparen was bidding this distinguished individual adieu, Fr. Fuller said in an inviting tone: "I shall be here to-day and to-morrow and shall be pleased to see you again."

Chief-Justice Fuller and Judge Bond are by law constituted two of the three members of the tribunal. Who the third one will be is a matter of conjecture. The political complexion of the appointees has also been the subject of some comment.

The chief justice is a Democrat, while Judge Bond is a Republican. Whether they will compromise of each making an appointment is not known. Should the third judge be allowed a yote, which seems doubtful, of course there would be a Republican majority so to speak.

It was hinted last night that neither official would come from Richmond, and that more than likely the selections have already been agreed upon from material
